

SALT SPREADER

HIGH IMPACT - CUTTING EDGES

Low coefficient of friction, less chatter

**VIBRATORY
COMPACTOR LINERS**

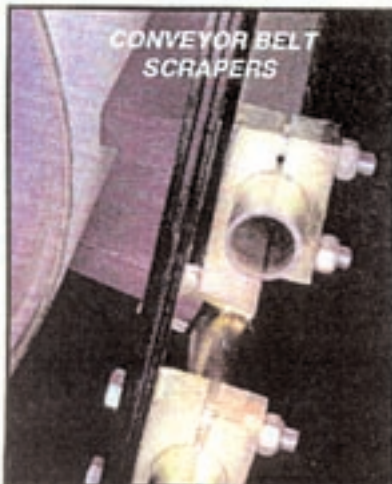

SCRAPERS

High abrasion and impacts in higher operation temperatures

PLOW CUTTING EDGES

High abrasion, cutting, low temperature flexibility, impacts, and dynamic loading

**CONVEYOR BELT
SCRAPERS**

High abrasion accompanied by cutting and repeated flexures associated with belt splices.

Additional Applications:

- FLOOR CLEANING MACHINES • ROLLERS & WHEELS
- TRACK PADS • CHUTE LINERS • AUGER FLIGHT SHOES
- SHOCK ABSORBERS FOR VIBRATORY TAMPERS

Pleiger Plastics Company is a custom molder of high performance polyurethanes for use in a wide variety of industries. Pleiger specializes in engineered solutions to wear and performance problems through our Plei-Tech line of polyurethanes. Each application is analyzed by our engineering staff in order to provide the best Plei-Tech compound which will maximize product performance. Full prototyping facilities are available for product testing and evaluation. This approach allows Pleiger Plastics to optimize the cost versus performance issue associated with every product.
