

POLYURETHANE APPLICATIONS *Scrapers & Belt Cleaners*

Pleiger Plastics Polyurethane Scrapers & Belt Cleaners

- Industrial grade scrapers with superior cut and abrasion resistance for conveyors, construction and snow plows.
- Our success with producing quality scrapers is accomplished by combining dynamic performance with cut and abrasion resistance. The resulting compound is used for snow plow cutting edges, high speed conveyor scrapers, construction equipment, chute liners, doctor blades, and industrial squeegees

CUT AND ABRASION RESISTANCE

- Cut and abrasion resistance are two areas where Plei-Tech® polyurethanes shine. Even our commodity grade polyurethane will last longer than rubber in most applications.
- Depending on the Plei-Tech® compound selected, it is not uncommon to have service lives seven to ten times longer than steel or rubber.
