

Pleiger Plastics is introducing the squeegee Pit-Stop Pack to the textile screen printing market. Our squeegee pack is a **time saving solution** to preping and cutting squeegees for the press.

Pleiger's Squeegee Pit-Stop Pack includes 10 ready to install squeegees, cut to 16" lengths with radii on the ends.

The **assorted profile pack** includes 10 squeegees (3 different profiles & 4 durometers) which will retrofit an entire automatic printing press in minutes. This variety will give printers the deposit control needed for printing any color.

The **single durometer pack** includes 10 squeegees of any one durometer in the SES profile (ex. 10 pcs of SES 70A). Perfect for the printer who has a preferred squeegee blade.

Why buy the Squeegee Pit-Stop Pack?

1. **FAST CHANGE:** Reduce downtime by eliminating the need to cut and prep squeegees. Radii on ends for immediate installation.
2. **EDGE:** Manufacturer's edge for precise printing
3. **PROFILE & DUROMETER SELECTION:** For printing all colors
4. **HIGH PERFORMANCE POLYURETHANE SQUEEGEES:** Improve print quality and longer life
5. **MINIMAL SWELLING, SHARP EDGE RETENTION, ABRASION & SOLVENT RESISTANT**
