

Covid-19 (SARS-CoV-2)

We at Pleiger Plastics Company take the safety of our staff and community very seriously, while also striving to meet the high expectations of our customers every day. In the coming weeks, with the uncertainty of the entire U.S. economy, we will be working hard to balance employee safety and customer needs, however we do ask for your understanding as we work through these difficult times. For the next few weeks, possibility months, Pleiger Plastics Company will follow recommendations of the CDC and WHO when making decisions related to factory operations.

As a manufacturing company, we have limited ability for work from home, and as long as the risk to our staff is low and manageable, and governmental agencies have not required a complete shutdown, we will continue working as close to normal as possible.

Our office staff does have the possibility to work remotely, albeit less efficiently than if they were in their factory offices. That being said, if you have any questions, please reach out to your Sales Representative via phone or email (<http://pleiger.com/directory/>) and they will help you. Even in the event of a complete shutdown, we will still be able to assist with Engineering, Order Prioritization, A/P and A/R questions, and most other day to day office functions.

In the event of a full closure, we will post a notice on our home page letting you know, and we will update the page with any updates as they would become available.

The Pleiger Group of Companies has weathered this storm at our factories in China and South Korea, and as we deal with the current uncertainties in Europe and the United States, rest assured, we will continue providing our customers with the high quality products and service they have become accustomed to as soon as possible.
